

Health is Cool 360° platform

Helping your employees take charge of their health

Employers are taking a greater interest in the health and wellness of their employees. We want to be your partner in promoting health and wellness in your workplace. That's why we have developed the Health is Cool 360° platform, an innovative service to help employees navigate the Canadian healthcare system, find reliable information and get answers to all their questions. That way, they can make informed decisions about their health, whether it's to prevent an illness or cope with one. The Health is Cool 360° platform is accessible by telephone from Monday to Friday, and online 24 hours a day, seven days a week.

A practical one-stop service and a health evaluation tool for your employees

Our platform's secure site is user-friendly, easy to navigate, and based on Canadian content. It contains clear information written in plain language that takes the mystery out of medical jargon. Employees can learn how to take better care of their own health and the health of their families. They can find advice, articles, brochures and medical directories. Our platform can also help them find a doctor or a clinic and provide them with information on prescription drugs and diseases. Employees who are looking for personalized, confidential assistance can speak with a health specialist over the phone and ask to receive more complete information by mail or email.

Thanks to the *Health evaluation* tool, employers and employees alike can take a proactive approach to managing health risks before they become problems. We partnered with Novus Health to develop this tool to help employees improve their health and wellness, which in turn helps employers reduce their group plan costs.

The *Health evaluation* tool gives employees a comprehensive, confidential report on the state of their health and risk factors, as well as a personalized action plan. It also gives you a global snapshot of your workforce's health, showing which health risks are most prevalent so you can target problem areas.

The Health is Cool 360° platform is part of Health and Wellness 360°, the prevention arm of our service offer that helps prevent illness and promotes workplace wellness. With the Health is Cool 360° platform, employees can take charge of their health and you can better manage the costs related to employee absences and improve your company's bottom line.

About Novus™ Health

Novus Health is an information and technology-enabled health services provider. The leader in health navigation and wellness solutions, Novus Health helps organizations make healthcare more accessible, understandable, and effective for their members and clients. Novus Health's solutions are provided to over five million Canadians from coast to coast. Offices are located in Toronto and Montreal.
