

Dynamic Therapeutic Formulary (DTF)

Prescription Drug Listing for Plan Members

The following drug listings are intended as a guide to help you and your physician determine if a prescribed drug is covered under the DTF. DTF drugs will be reimbursed at a higher percentage rate than other medications available under your plan.

The DTF is a **generic** formulary, so when there is a generic that is considered interchangeable with the **brand name drug**, only the cost of the generic will be reimbursed.

HOW TO SEARCH

To help you determine the coverage of a particular drug, you can search for it in the listing by using these quick steps:

- 1) Hold down the Ctrl key + F key (PC) or CMD key + F key (Mac) on your keyboard.
- 2) A search box will open. Type in either the DIN # or the drug name, then press enter.

This list is subject to change upon review of new products or information.

ANTINEOPLASTIC AGENTS

Class	DIN	Drug Name	Chemical Name	Type	Strength	Dosage
