Investment Strategy

The investments are actively managed in order to provide a superior real return derived from long-term capital appreciation by investing in a diversified portfolio of established Canadian issuers. The strategy uses a disciplined bottom-up, fundamental value approach to invest in companies trading at discounts to their business value, based on the belief that stocks purchased at discount to business value provide a margin of safety. This combined with a focus on quality companies with stable, growing businesses, with strong balance sheets, should provide important downside protection.

Notes

The fund is currently closed to new plans.
