Volatility Analysis

Investment Objective

This fund aims to reproduce the annualized return of the MSCI World Custom Yield Minimum Volatility Special Weighted Net Index, expressed in Canadian dollars, over four-year moving periods.

Benchmark

MSCI World Custom Yield Minimum Volatility Special Weighted net

Investment Strategy

This Fund, managed based on a multi-factorial approach, aims to provide long-term capital growth while favoring current income and volatility reduction by investing in global equity securities. The manager seeks to track the return and risk profile of a multi-factorial index, which focuses on income-producing quality securities and displaying a defensive nature offering capital protection in down market periods. The index replication process utilizes an option overlay strategy which seeks to obtain upside market returns using a combination of listed equity index call and put options. The multi-factorial index is also adjusted to incorporate environmental, social and governance considerations.

Additional constraint : No more than 10% of the fund's market value may be invested in the option overlay strategy.
